

## Employee Self Service Center

**More Information For Your Employees, Less Work For You!**

### *What Is Employee Self Service?*

Employee Self Service is one of the most popular innovations in the world of benefits and payroll. In short, it allows your employees confidential on-line access to their payroll and benefits information, anywhere, anytime.

With Paypro's Employee Self Service, your employees log onto Paypro's secure website and confidentially access their personal information. Employee information is available 24/7 which means no waiting and less work for your payroll and/or benefits administrator!

### *Information Available on Paypro's Website*

Some of the information that's available on Paypro's Employee Self Service Center website, includes:

- Reprint current or prior paycheck stubs
- Review YTD earnings
- Review contact information
- Review personal tax status
- Review direct deposit information
- Review vacation and other benefit accruals

### *Access Without Employer Liability*

Many employers are expressing concern over the liability incurred by employees making their own on-line changes. Paypro's Employee Self Service Center is read-only. With Paypro's solution, your employees can access their information but can't make any changes to the data.

### *How Is This Service Implemented?*

It is very easy to implement Paypro's Employee Self Service! For an extra few cents per employee, you will have the payroll and benefits communications capability that, until recently, only Fortune 1000 companies could afford to implement.

### *Ready To Get Started Or Want To Learn More?*

Contact your Paypro Payroll Representative or a Paypro Consulting Services Team Member for more details.
