

The Payroll Account Reconciler

Automating the Payroll Bank Account Reconciliation Process

What Our Clients Have Said About Check Reconciliation:

“Reconciling my payroll account is like a trip to the dentist.”
 “I clear items by mistake, then I search and search for the problem.”
 “The process takes me 3 to 4 hours. Isn't there a better way?”

What Is the Payroll Account Reconciler?

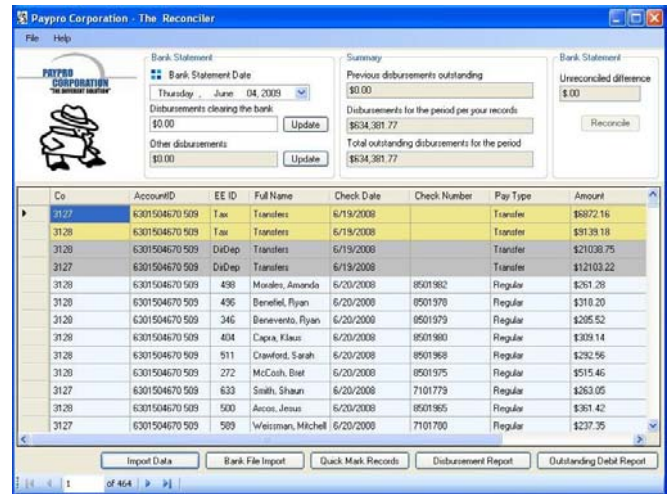

Paypro's Payroll Account Reconciler automates the reconciliation of payroll debits to your bank account. The Payroll Account Reconciler can be configured to include not only live checks but direct deposits and tax impounds depending on your needs.

How Does the Payroll Account Reconciler Work?

The Reconciler takes all your payroll impounds directly from Millennium and produces a payroll disbursement register, no manual input is required. By importing a file of cleared items from your bank, the Reconciler will automatically compare the period disbursements against cleared items and produce an Outstanding Disbursement Report. It's that simple! But that's not all. Here's a bonus! The Reconciler analyzes your period's debits against cleared items and calculates your balance in real time. No more reconciliation guesswork!

Trial Offer

If you qualify, Paypro will provide you with a **2 month trial offer**. If after two months you don't feel the Reconciler is a great time and money saver, we won't bill you for the two months you've used it. No questions asked!

Who Should Use the Payroll Reconciler?

- Are you spending more than one hour on payroll account reconciliation per month?
- Do you currently have Paypro's EZ Check (EZ Check utilizes Paypro's payroll account) solely to avoid the difficulty of reconciliation?
- Are you currently paying bank reconciliation fees that could be eliminated?

If your answer to any one or all of the above questions is yes, the Payroll Account Reconciler is a solution for you!
